SUMMARY

UI/UX designer and prototyper with a deep understanding of each stage of the design process, from research to prototyping and final implementation. Known for actively listening to team and user feedback to transform ideas into effective digital solutions. Passionate about creating user-friendly designs using Figma and Flutter. Coding skills enable seamless collaboration with front-end developers to bring design ideas to life and deliver cohesive results.

SKILLS:

- CSS
- HTML
- Dart
- Wireframing
- Testing

- Motion design
- Interaction design
- Critical thinking
- Creativity
- Adaptability

PROJECTS:

GamefierSA:

- **Description:** GamefierSA, a company that offers gamification solutions to other businesses, asked us to create a prototype redesign for EWallet app, incorporating gamification elements to enhance user engagement.
- **Challenge:** The existing design lacks interactivity and fails to motivate users, needing an infusion of gamification strategies to improve user experience.
- **Results:** Developed a comprehensive prototype that integrates gamification features to encourage user participation and retention, alongside a streamlined interface.
